MEDICAL FACILITIES

MDP architects operates on several fields of design market. One of them is medical facilities and medical laboratory design.

MDP is a part of international group MDArchitects. Currently MDP is a separate and independent office strictly cooperating with MDArchitects. The design activities connected with medical care and science are being held in Poland.

Polish design office which was opened in 1998 originally concentrated on design of retail centres and urban planning.

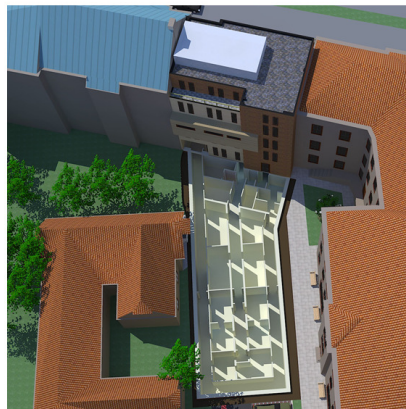

In 2007 it started to broaden their service offer and got involved in designs for Collegium Medicum of the Jagiellonian University in Kraków. This part of MDP's activity has been connected with highly demanding medical facilities and detailed medical laboratory design market.

As architects MDP currently cooperates with variety of highly specified subconsultants to offer full range design required for development of this kind of investments.

The service provided by MDP included scientific medical laboratory centres for the University, specialistic laboratories, forensic radiology labs and training centres for medical students.

Over last five years MDP has carried out number of designworks together with large medical centre due diligence and advisory services.

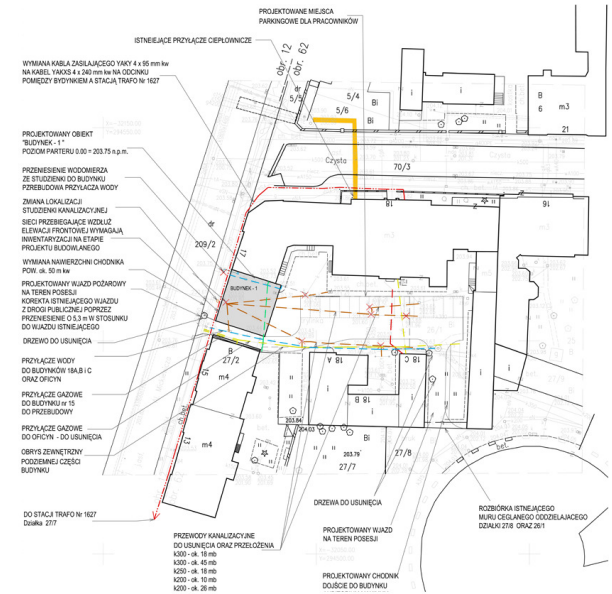

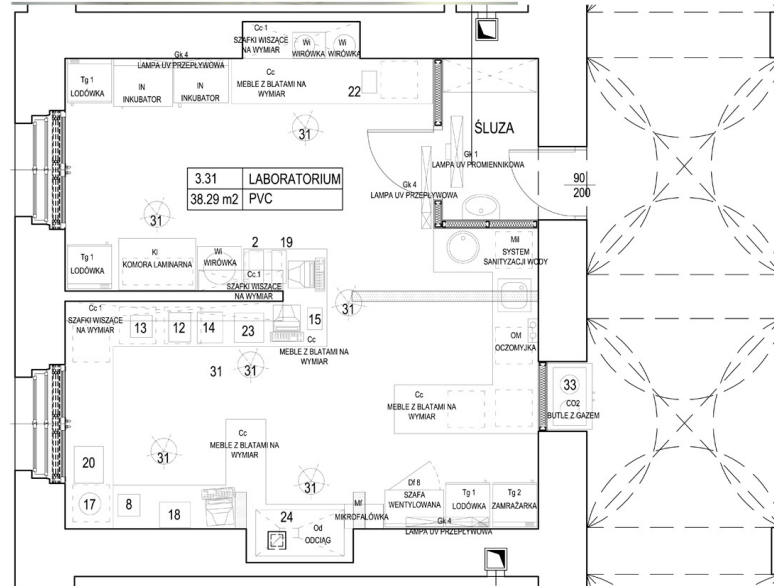

Considering the whole obtained experience including large scale service and retail objects, residential, planning and specialist design MDA are fully prepared to provide worldwide services connected with variety of investments of different kinds including medical care facilities and medical laboratories.

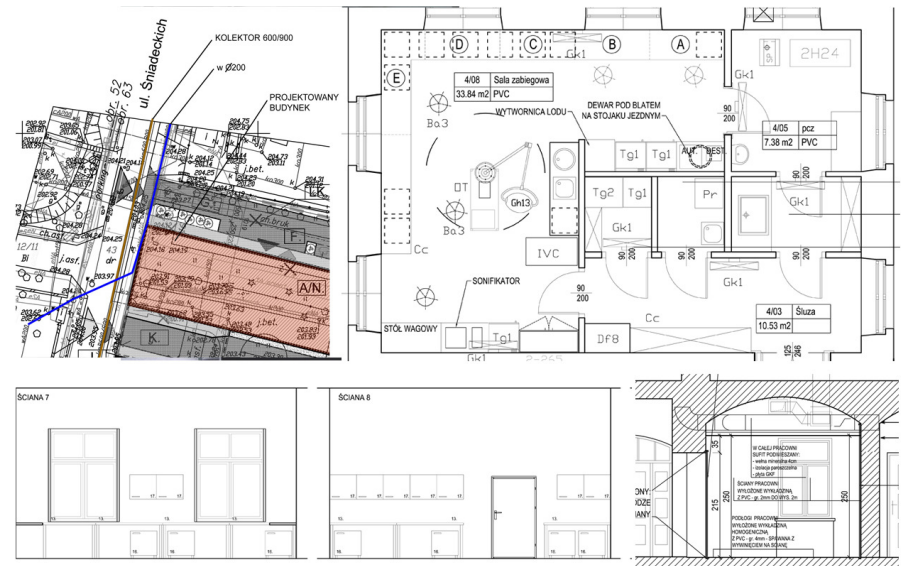

Over last years MDP architects have carried out designs regarding following kinds of facilities:

- medical, scientific and educational complex for immunology, pathophysiology and microbiology departments
- animal testing labs
- histopathology laboratory
- forensic medicine laboratory
- pharmacology lab and training complex
- ether labs
- physiology in vitro testing laboratory
- forensic medicine radiological centre
- physiological laboratory
- physiological animal testing laboratory
- biomedical centre (due diligence)

The designs are carried out in strict cooperation with certified medical technology design offices in Poland responsible for details and knowledge required for this kind of projects.
